

RESOLVE MINING CONSULTANTS (Pvt.) Ltd

COMPANY PROFILE

BACKGROUND

Founded in 2022, Resolve Mining relies on experts that have extensive technical knowledge and proven experience in addressing operational challenges associated with mining development, mining production, mining construction, shafts, underground support, mine ventilation, environment and safety, to achieve superior results.

At Resolve Mining, we apply our front-line experience earned over many years of underground and open pit mining across various minerals to resolve mining problems. We offer sustainable mining solutions that are efficient, low cost, safe, real time and effective.

We believe that mining is an art, a skill, an ability that comes through experience. We aim to achieve superior results by putting into practice what we have successfully done at the coal face.

To become a leading multi-disciplinary mining consultancy in Africa.

VISION

To be the preferred mining consultancy partner that applies front-line experience, knowledge and modern technology to resolve mining challenges and achieve sustainable growth for our clients and stakeholders.

MISSION

- Underground Mine Ventilation Solutions
- Trackless Mobile Machinery (TMMs)
- Major Mining Construction Work
- Mining Project Management
- Mining Development
- Mining Production
- Rock Engineering

SCOPE OF WORK

Mining Development

We are contract mining specialists in Life-of-Mine Development, Run-of-Mine Development as well as Critical Development. We efficiently conduct drill, blast, load, haul and construction operations in haulages, cross-cuts, raises (including ventilation raises), declines and shafts at optimum advance per machine shift, cost per metre and safely. At Resolve Mining, we guarantee high machine and labour utilisation as well as efficient waste movement.

Mining Production

At Resolve Mining, we have the capacity to efficiently carry out all or part of drill, blast, load, haul and dump activities as contractors.

We offer efficient rock fragmentation in stoping, low-cost secondary blasting and appropriate maintenance of roadways and or tracks.

We apply our front-line experience and knowledge to optimise extraction of ore in remnant ore bodies and old workings.

TMMs

Through partnerships, Resolve Mining offers optimum waste and ore movement services via applicable tailor-made Service Level Agreements (SLAs).

The service level agreements may include provision of spares and skilled manpower for repair and maintenance of trackless mobile equipment units to achieve set equipment availability, utilisation and related key performance indicators (KPIs).

Feasibility Studies

A photograph of two smiling individuals in mining safety gear. The person in the foreground is a woman wearing a white hard hat with 'HARMS' and '120' visible, clear safety glasses, and an orange high-visibility shirt. The person in the background is a man wearing a white hard hat, safety glasses, and an orange high-visibility shirt with 'HARM' visible on the sleeve. They are both looking towards the camera with positive expressions.

The multi-disciplinary team of experts at Resolve Mining has extensive mining project management experience. To this end, the team can conduct scoping, conceptual and bankable feasibility studies for mining companies across the mining value chain. This applies to greenfield as well as brownfield or related ramp-up projects

Mining Construction

Our experienced crews are capable of mining and constructing major grizzlies, underground crusher chambers and underground Trackless Mobile Machinery workshops within set project timelines.

Additionally, our crews are capable of carrying out major shaft infrastructure rehabilitation and repair work that enhances shaft availability and utilisation.

Mine Ventilation

Resolve Mining relies on its experienced ventilation engineers and technicians to design and implement underground mine ventilation systems that ensure clearance of all foul air, heat and dust from the underground environment as well as supply adequate fresh air.

Rock Engineering

Our highly qualified and experienced rock engineers provide geo-mechanical advice in both surface and underground mining. Our unbiased technical advice is based on our front-line experience and extensive knowledge of rock behaviour and support performance

We provide innovative rock engineering solutions that promote safety and high production levels.

We install all types of underground rock support systems.
